

## CHEMICALLY TEMPERED GLASS SURFACE STRESS METER JF-2

The JF-2 is portable and easy to use instrument to measure the depth of layer and the surface stress of chemically tempered glass.

It is available as one unit with a touch screen, or as a measurement head attached to your PC by USB cable.

### SPECIFICATIONS

Refractive index range: 1.47~1.53 (other RI range customized according to requirement)

Stress: up to 1000 MPa

Depth of layer: 10- 100 $\mu$ m

Accuracy: 20 Mpa/5 $\mu$ m

Light source: 590/750 nm
